How does the web works?

- Because open standards allow every network to connect to every other network
- Internet makes possible for anyone to create content, offer services, and sell products without requiring permission from a central authority.
- It levels the playing field for everyone and it's the reason why we have a rich diversity of applications and services that many of us enjoy today.

What do you need to be a web developer?

- User experience (UX)

- User interface (UI)
